HYDROFILL™ WATERING CART

PART #: CRT-12V

More often than not, a water supply is in a hard to reach position. What's more of an issue is that operators often use impure water to fill their batteries, causing a lot of issues such as:

- Increased self-discharge.
- Shortened run time.
- Reduced battery life.

The HydroFill Cart is a mobile watering cart that solves all of these problems.

It's great for filling batteries in small and medium fleets, the ergonomically designed wheels and handle means it can be moved around the warehouse easily even at full capacity. It's been designed with durability in mind and its tough body makes it extremely durable.

The HydroFill Cart is easy to fill directly from a HydroPure Deionizer system thanks to it's large opening and there are no power cords to trip over.

The connector fits directly onto the Gun-X™ Watering Gun and delivers the right amount of pressure the watering gun requires to fill the batteries quickly and efficiently.

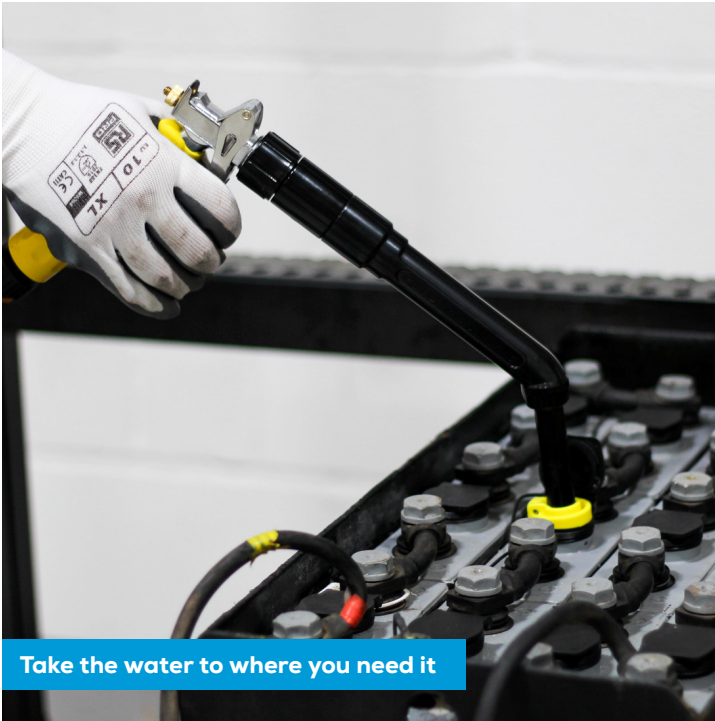

All of these features help to:

- Ensure batteries are filled easily and quickly.
- Increase battery life.
- Reduce frequent battery purchases.

THE PERFECT PARTNER FOR THE GUN-X

PART #: GUN-X

Take the water to where you need it

Fill the cart directly from the HydroPure System

As standard the HydroFill is supplied with a quick connect fitting. Adapters are available if other types of fittings are required. When combines with the HydroPure Water Deionizer, the HydroFill forms part of the most effective battery maintenance programmes available, saving you both time and money.
